<sup>1</sup> GPGPU: general purpose computation on graphics hardware

 David Luebke, Mark Harris, Jens Krüger, Tim Purcell, Naga Govindaraju, Ian Buck, Cliff Woolley, Aaron Lefohn

August 2004 **Proceedings of the conference on SIGGRAPH 2004 course notes GRAPH '04**

**Publisher:** ACM Press

Full text available:  pdf (63.03 MB) . Additional Information: full citation, abstract

The graphics processor (GPU) on today's commodity video cards has evolved into an extremely powerful and flexible processor. The latest graphics architectures provide tremendous memory bandwidth and computational horsepower, with fully programmable vertex and pixel processing units that support vector operations up to full IEEE floating point precision. High level languages have emerged for graphics hardware, making this computational power accessible. Architecturally, GPUs are highly parallel s ...

## 2 Toward an engineering discipline for grammarware

 Paul Klint, Ralf Lämmel, Chris Verhoef

July 2005 **ACM Transactions on Software Engineering and Methodology (TOSEM)**,  
Volume 14 Issue 3

**Publisher:** ACM Press

Full text available:  pdf(710.42 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Grammarware comprises grammars and all grammar-dependent software. The term *grammar* is meant here in the sense of all established grammar formalisms and grammar notations including context-free grammars, class dictionaries, and XML schemas as well as some forms of tree and graph grammars. The term *grammar-dependent software* refers to all software that involves grammar knowledge in an essential manner. Archetypal examples of grammar-dependent software are parsers, program converters ...

### 1 [Appearance & illumination: Visual simulation of weathering by γ-ton tracing](#)

Yanyun Chen, Lin Xia, Tien-Tsin Wong, Xin Tong, Hujun Bao, Baining Guo, Heung-Yeung Shum

 July 2005 **ACM Transactions on Graphics (TOG)**, Volume 24 Issue 3

Publisher: ACM Press

 Full text available: [pdf\(696.87 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Weathering modeling introduces blemishes such as dirt, rust, cracks and scratches to virtual scenery. In this paper we present a visual stimulation technique that works well for a wide variety of weathering phenomena. Our technique, called γ-ton tracing, is based on a type of aging-inducing particles called γ-tons. Modeling a weathering effect with γ-ton tracing involves tracing a large number of γ-tons through the scene in a way similar to photon tracing and then generat ...

### 2 [Simulation: Rendering cracks in Batik](#)

Brian Wyvill, Kees van Overveld, Sheelagh Cappendale

 June 2004 **Proceedings of the 3rd international symposium on Non-photorealistic animation and rendering**

Publisher: ACM Press

 Full text available: [pdf\(568.13 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

We present an algorithm for simulating the cracks found in Batik wax painting and dyeing technique used to make images on cloth. The algorithm produces cracks similar to those found in batik due to the wax cracking in the dyeing process. The method is unlike earlier simulation techniques used in computer graphics, in that it is based on the Distance Transform algorithm rather than on a physically based simulation such as using spring mass meshes or finite element methods. Such methods can be dif ...

### 1 [Natural phenomena: Visual simulation of ice crystal growth](#)

Theodore Kim, Ming C. Lin

 July 2003 **Proceedings of the 2003 ACM SIGGRAPH/Eurographics symposium on Computer animation SCA '03**
**Publisher:** Eurographics Association

Full text available: pdf(8.35 MB)

 Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The beautiful, branching structure of ice is one of the most striking visual phenomena of the winter landscape. Yet there is little study about modeling this effect in computer graphics. In this paper, we present a novel approach for visual simulation of ice growth. We use a numerical simulation technique from computational physics, the "phase field method," and modify it to allow aesthetic manipulation of ice crystal growth. We present acceleration techniques to achieve interactive simulation p ...

### 2 [Texture mapping and synthesis: Synthesizing bark](#)

Sylvain Lefebvre, Fabrice Neyret

 July 2002 **Proceedings of the 13th Eurographics workshop on Rendering EGRW '02**
**Publisher:** Eurographics Association

Full text available: pdf(4.76 MB)

 Additional Information: [full citation](#), [abstract](#), [references](#)

Despite the high quality reached by today's CG tree generators, there exists no realistic model for generating the appearance of bark: simple texture maps are generally used, showing obvious flaws if the tree is not entirely painted by an artist. Beyond modeling the appearance of bark, difficulties lies in adapting the bark features to the age of each branch, ensuring continuity between adjacent parts of the tree, and possibly ensuring continuity through time. We propose a model of bark generatio ...

- 1 [The development of three-dimensional spatial modeling techniques for the construction planning of nuclear power plants](#)

Harold J. Borkin, Jonn F. McIntosh, James A. Turner

 August 1978 **ACM SIGGRAPH Computer Graphics , Proceedings of the 5th annual conference on Computer graphics and interactive techniques SIGGRAPH '78**, Volume 12 Issue 3

Publisher: ACM Press

 Full text available: pdf(584.58 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The results are presented of the first phase of a research project on the application of spatial modeling techniques to the process of planning and executing the construction of a nuclear power plant. A computer modeling technique, based on sets of polyhedra and spatial operations, was developed and applied to modeling the components of a nuclear power plant. The objectives of the modeling are: to store and retrieve information about the various systems in the facility; to produce drawings ...

- 2 [Diagnosis of power plant faults using qualitative models and heuristic rules](#)

Irina Obreja

 June 1990 **Proceedings of the 3rd international conference on Industrial and engineering applications of artificial intelligence and expert systems - Volume 1 IEA/AIE '90**

Publisher: ACM Press

 Full text available: pdf(553.41 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

This paper presents results obtained in an AI research effort in the industrial field of Nuclear Power Plants (NPP): malfunction diagnosis of the Emergency Feedwater System (EFWS) of a NPP. An expert system was developed which utilizes qualitative techniques for modeling the system and heuristic rules for generating causal explanations of an observed malfunction. The operation of the system, the model and the global inference mechanism are discussed. Another purpose of the paper is to prese ...

## 21 [Information processing model of information technology adaptation: an intra-organizational diffusion perspective](#)

Randolph B. Cooper, Richard A. Wolfe

 February 2005 **ACM SIGMIS Database**, Volume 36 Issue 1

**Publisher:** ACM Press

 Full text available: pdf(603.74 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Appropriate information technology (IT) diffusion facilitates the achievement of expected return on IT investments. The purpose of this study is to advance IT diffusion research by employing information processing theory as a lens with which to examine the adaptation (design, development, and installation) process. This is in contrast to much of the IT diffusion research, which focuses on factors affecting usage of an IT by members of an organization. We link information processing theory to the ...

- 1 [Cursor control and pointing devices: Accuracy and frequency analysis of multitouch interfaces for individuals with Parkinsonian and essential hand tremor](#)

Eric J. Frett, Kenneth E. Barner

 October 2005 **Proceedings of the 7th international ACM SIGACCESS conference on Computers and accessibility Assets '05**

Publisher: ACM Press

 Full text available: [pdf \(166.13 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

In this study, the accuracy of an optical mouse, optical trackball, isotonic joystick, and a FingerWorks MultiTouch Surface (MTS) are compared for users suffering from Parkinsonian tremor and essential tremor. Using a data acquisition program, *WinFitts*, created at the University of Oregon's HCI Lab, data collected from five subjects with Parkinsonian tremor, five with essential tremor, and eleven with no tremor is analyzed and compared. Both *temporal* and *spatial* analyses are ...

- 2 [Programming languages for computer music synthesis, performance, and composition](#)

Gareth Loy, Curtis Abbott

 June 1985 **ACM Computing Surveys (CSUR)**, Volume 17 Issue 2

Publisher: ACM Press

 Full text available: [pdf \(3.57 MB\)](#)

 Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The development of formal, descriptive, and procedural notations has become a practical concern within the field of music now that computers are being applied to musical tasks. Music combines the real-time demands of performance with the intellectual demands of highly developed symbolic systems that are quite different from natural language. The richness and variety of these demands makes the programming language paradigm a natural one in the musical application of computers. This paradigm ...
